Put SAP® solutions in your pocket
with Mobile Workplace

Mobile Workplace is a native SAP® Netweaver application which provides:

- Out of the box approval support with little/no configuration and coding
- Rapid development tools for mobilizing ANY SAP® transaction on the BlackBerry, iPhone and Windows Mobile platforms

Simple to Implement

Many scenarios are supported 'out-of-the-box' however Mobile Workplace also provides an enhancement framework which supports complete control over the look and feel.

Simple to Use

With its intuitive user interface, Mobile Workplace users are up and running in minutes.

Iron clad security & complete SAP® audit trail

Leveraging RIM's BlackBerry Enterprise Server, allows Mobile Workplace to provide a secure platform including data encryption and authentication.

Since Mobile Workplace is a native SAP® Netweaver application, all actions executed by the user, fall under the standard SAP® security and audit trail mechanism.

Increase ROI on existing investment

Mobile Workplace leverages your existing SAP® and BlackBerry infrastructure, thus increasing your ROI. Because no new servers or technologies are introduced, the learning curve for support staff is short. Furthermore, existing processes (reporting, security) are not affected.
